ABOUT BABYSHIBBY INU

BabyShibby Inu was developed by an experienced team composed of international investment funds, dApp developers, marketers, and financial experts.

It is the perfect mix of business and technology with a clear and concise roadmap to disrupting the world of Cryptocurrency.

The token was designed to support large volumes of investors and generate healthy returns for participants. It is the first-ever Hyperdeflationary and AutoBOOST token.

This means that BabyShibby Inu (BABYSHIB) will automatically follow every sell with a buy to prevent large selloffs.

Additionally, every purchase shall further provide members with the auto-boost and hyper deflation system in place.. As the BabyShibby Inu token becomes a mainstream currency, it will simultaneously help all people of Earth have a safe planet on which to live.

BABYSHIBBY INU STORY

The mega-intelligent world is on the way to reach the 8.0 era. However, IT ISN'T ENOUGH. We're rushing to leap through time to explore a whole new world to help human beings develop and reach the peak of technology innovation.

The only one who is qualified for carrying out this task is nobody other than BabyShibby Inu – the single son of the Great Shibby Inu. We have developed and created the most advanced spaceship ready for BabyShibby Inu to start its own adventure.

However, just a little bit of energy for the journey – “WE NEED YOU TO JOIN-HAND”. The World's first Auto-Boost, Hyper Deflationary Coin is here! BabyShibby Inu (BABYSHIB) is on a mission to explore the new space.

OUR MISSION

Additionally, every purchase shall further provide members with the auto-boost and hyper deflation system in place.. As the BabyShibby Inu token becomes a mainstream currency, it will simultaneously help all people of Earth have a safe planet on which to live.

WHY BABYSHIBBY INU

BabyShibby Inu solves three major problems in the current market of currency: BabyShibby Inu has much faster transactional speeds in comparison to Bitcoin. It cannot be hacked or stolen through cyberattacks, and it is completely managed by computers, thereby eliminating the possibility of human error. In addition to these major technological improvements, it is optimal for investors and is specifically designed to bring holders a return on their initial investment. BabyShibby Inu is the FIRST token ever that has included the AutoBOOST function. This means that every seller will be followed by an automated buy so that large selloffs will be much less prevalent. Additionally, investors will gain tokens over time just by holding BabyShibby Inu. Lastly, the team behind BabyShibby Inu is working every day to improve technology and bring new holders to the token.

BABYSHIBBY INU TOKEN TECHNOLOGY

The other feature of BABYSHIB is Autosnip. Based on the available regime of some apps and platforms such as Poocoin, Bogged, etc.

BABYSHIP's difference is that you can target even when you are farming or staking. It looks like a so-called mini-game "Funny Farm". You can adjust the specification of the tokens or coin as you wish, such as the total capacity, total burn, liquidity, launching date, etc.

When the tokens or coins meet the criteria, they will automatically pump up in your fields. All you have to do now is just click to see their specifications instead of visiting other websites. The more CakeLP BABYSHIB you own, the more priority you have.

Your eyes won't be covered as playing gamble in order to avoid scams. This is not all. The feature that helps BABYSHIB become a monopoly in the Crypto market is the automatic analysis of Token data, which shall determine the potential tokens, display the percentage of risk when investing in such tokens.

You've heard about a win-chance analysis machine in Casino? You just need to slightly open your cards, the system shall make the statistics based on your game's history and accordingly exclude the inappropriate cards, only the potential cards can be presented in the list.

BABYSHIBBY INU TOKEN TECHNOLOGY

We have made the survey on 1000 persons who knew/invested in Crypto to see the feasibility of this app. Almost all of them say no possible to do that. We ourselves cannot believe it either until our Dev issued the demo version. Although there are still faults on that, "Nothing is impossible". The same as bitcoin was developed in blockchain and it needs to resolve so many problems in order to be possible to dig coin.

For the giant sharks, smart investors, we just need to summarize to comprehensively understand the potential of this regime that you should not ignore. We hope to launch this feature before 31st Dec 2021 or at the latest 31st Jun 2022.

Despite being late and young, it's not possible that we are slower. The Crypto market is of potential but yet risky market. It's important whether you dare to challenge yourself.

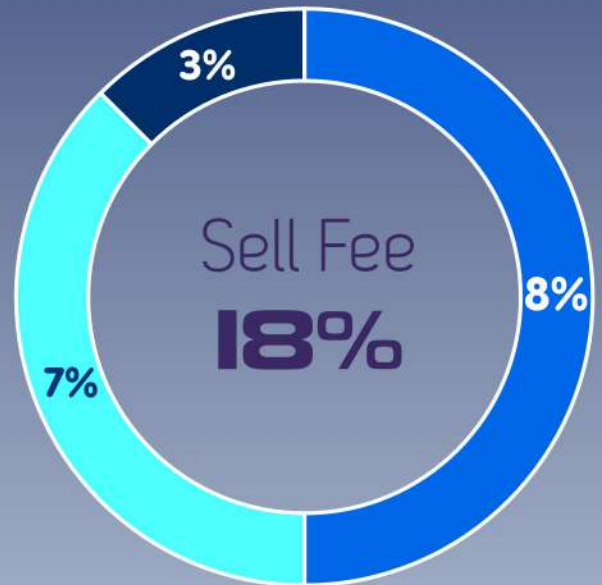

DISTRIBUTIONS

The system has created a total of 1,000,000,000,000,000 BabyShibby Inu tokens. The Development team has optimized distribution for maximum efficiency of the token. 1 of tokens will be part of the Competitions rewards. 1.2 will be set aside for a private sale to include paid influencers and promotions. 6.75 will be used for PreSale, 5.25 add to Liquidity, and other will be distributed and burned. Overall BabyShibby Inu is moving forward with a plan to benefit our users as much as possible.

TOKENOMICS

■ Buyback Fund ■ Reflection to Holders ■ Marketing/Development

2st and 2nd Phases

CONCLUSION

The BabyShibby Inu token is unlike anything else the BlockChain world has seen. It has exceptionally unique tokenomics, it is developed by an experienced and transparent team and it aims to improve currency while saving millions of animals in the process. Through the development of new technology and marketing, BabyShibby Inu will become the future currency on earth. The journey will be filled with wins and losses, but loyal members will see a significant return on their investment.
